

City of Oceanside GIS Map Books

Developed by [GIS Division](#), Water Utilities Department, City of Oceanside

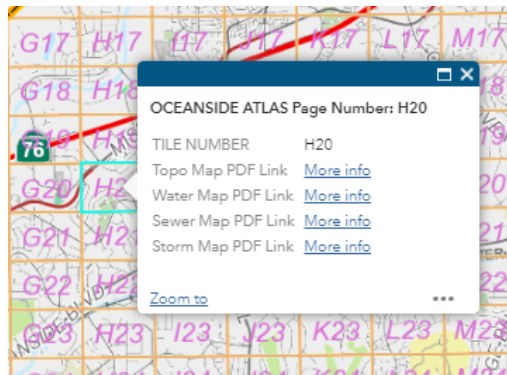

This application has been developed to present a grid index map with the links to the Water, Sewer, Storm, and Topography map books of the [City of Oceanside](#) in PDF format.

Each grid tile in the Index map has been linked to a numbered PDF of Water, Sewer, Storm, and Topography Map Books pages. The PDF documents are map layouts consisting of land base information plus water, sewer, and storm network systems, as well as topography data. The map pages have been set for printing on 11"x17" paper. If you print the PDF documents on 11"x17" landscape paper, the map scale will be 1"=200'.

For opening these map pages, you will need Acrobat Reader to be installed on your computer.

Here are some tips:

- Click on any location to get the list of map book pages of the entire grid tile. Then, click any link in the dialog box to open the individual map book page:

- To see the map legend, [click here!](#)
- To go to City of Oceanside Map Gallery, [click here!](#)
